

# BRAIN TAP

## *what it is*

The BrainTap headset guides your mind from an awake, reactionary mind into an intuitive, creative state, then to a place where super-learning and healing can occur, with the outcome being a heightened state of consciousness with crystal clear focus. It creates a symphony of brainwave activity, a feeling of calm focus that's just right for learning and productivity. Each session is designed with brainwave balance in mind.

## *how it works*

BrainTap features harmonizing tones synchronized with gently light pulses that travel through the ear meridians and the retina, sending direct signals to the brain and guiding you into deep relaxation. This innovative form of brainwave training is called frequency following response, and it provides maximum results in the least amount of time.

You simply slip on the BrainTap headset, start the audio and lower the visor, close your eyes and relax. You'll enjoy an empowering BrainTap Technology© (BTT) audio-session that is strategically encoded to deliver the most productive power nap imaginable for \$30 per session.
